Protection of personal Data

The increasing use of the internet in the world and in our country brings many conveniences, while the issue of protection of personal data has become more important.

In today's world, every sharing that was made , every data that was entered on the internet can be used by malicious people who want to reach you and your information. Especially social networks are the easiest way for malicious people to access your information. Before sharing, you need to think in detail what kind of consequences and risks you will have.

Even a game that you download to your smartphone and you can't wait to play can transfer your contacts to its database while you play the game, after obtaining your consent with a simple confirmation method with a small pop-up, and then share them with companies you don't know what they are doing

In this context, while governments and related sector stakeholders have been trying to produce technical solutions that will increase the user's control in data sharing, there are some points that internet users should pay attention to.

So

- We recommend that you activate the 'do not track' option of your internet web browser. You can find more detailed information on the subject in the web security section.

- Read the policy and confidentiality agreements of the web pages you want to process. In addition, you can get information about the page from the contact, about us sections of the relevant page.

- Analyze what kind of information the applications you download from mobile platforms collect from you. If necessary, do not download applications that you will not use a lot on your phone.

- Pay attention to what mobile apps you download are synchronized with. Disable information you don't want synced. For this, we recommend that you review your accounts, application management, location services and security in your phone settings.

- Reconsider your privacy and security settings on social networks. For this, we recommend that you read the section on safety in social networks.
