ONLINE MEASUREMENT / EVALUATION METHODS –TOOLS

When covid-19 started ,we all teachers ,students and families were shocked. Suddenly we were in a pandemic period. But we had to continue education in all conditions and evaluate /measure our students. We use the following WEB 2.0 tools to online measurement and evaluation

We can use these tools not only in distance learning but also in hybrid education and physical education.

We must have gmail account to use these tools,so it will be easier for us to use them.

Now we are going to study WEB 2.0 tools that we often use them

SOCRATIVE

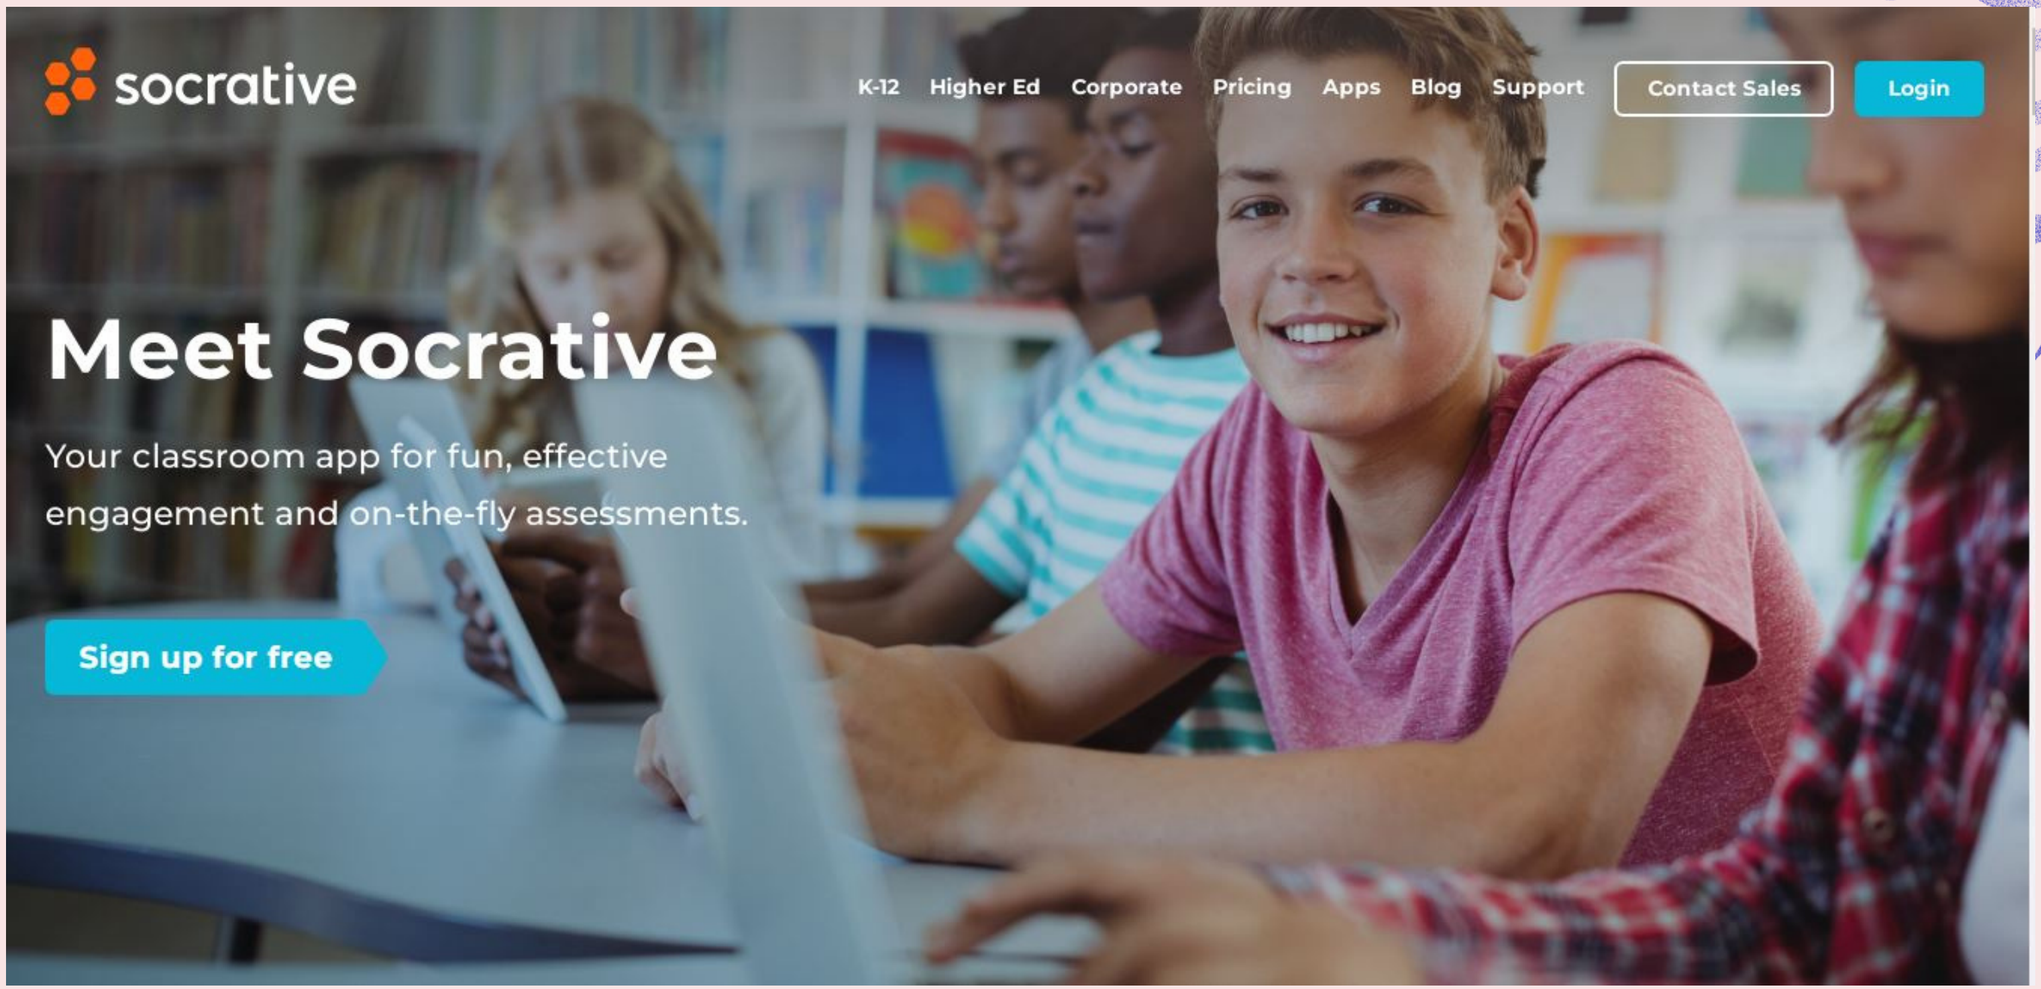
Socrative is a formative assessment tool that helps teachers and learners to assess understanding and progress in real time in class through the use of quizzes, questions and reflection questions

We can use Socrative for a class-wide quiz, or break up the class into groups. Individual quizzes are also an option, allowing teachers to work as they need for that subject.

Teachers are able to create quizzes with multiple choice answers, true or false responses, or one sentence answers, all of which can be graded with feedback for each student. There is also more group-based competitive answering in the form of Space Race

How does Socrative work?

Socrative is a formative assessment tool that helps teachers and learners to assess understanding and progress in real time in class through the use of quizzes, questions and reflection questions



How does Socrative work?

to understand how to make a Socrative now you need an account to work with Socrative only the teacher needs to log in.

After you're already logged in we can start straightaway to look at this great tool and some of the possibilities of how we can work with it I'm logged into Socrative and there are two or three key things you need to learn about . First this is your room and if you want you can change the name of the room . this is the room the code that you will need to give to the students you will always have the same room . you have got a free account secondly the most important thing for you will be where you launch your quizzes and where you create your quizzes here

How does Socrative work?

all these buttons here are quite useful .
we choose the type of quiz Multiple Choose , True/ False or Short asnwer
logging in on one browser as a teacher and then preparing the quiz/exam here.After writing the questions you will click on save and exit .then your quiz ready for the students.
Then the students will upload the socrative from the google play .then they start their exam. They need password to start the exam and the password is the name of your room J Then they write their name-surname and start the exam. We can see their results easily.

SLIDO

Slido is a web 2 tool where you can do live surveys and tests. Slido can actually be prepared collaboratively but this feature needs membership .After you log in , click on “create event “ and name this event.If you like you can decide the start and end date. The survey and test code is written below the dates.

First click on” create event “ then you will see “live pools”..they you will choose one of tests, word cloud, open-ended question, assessment and quiz etc.. Then create your events.After you create ,you will click on “activate pool “ so it will be active in a decided time.The students will see and answer them. If you want ,you can deactivate.

SLIDO

You can see “present mode “ button on the right side.When you click on it ,the events is open and students can start answer them.The students can use th QR code or they can go to slido.com and write the password to “event code “ .
This tool is great and only 100 participants can be in the event.

KAHOOT

How does Kahoot! work?

At its most basic, Kahoot! offers a question and then optional multiple choice answers. This can be enhanced with rich media such as images and videos to add more interactivity.

While Kahoot! can be used in the classroom, it's ideal for remote learning use. It's possible for teachers to set a quiz and wait to see the scores as students complete it. Or they can carry out a live hosted quiz using video – with third-party apps such as Zoom(opens in new tab) or Meet(opens in new tab) – to be there as students are working through the challenges.

KAHOOT

How does Kahoot! work?

While there is a timer-based quiz mode, you can also choose to turn that off. In that instance, it's possible to set more complex tasks that require research time.

Teachers can also review results and run analytics from game reports for formative assessments so as to better judge progress being made in class.

KAHOOT

How does Kahoot! work?

To get started head to getkahoot.com(opens in new tab) and sign up for a free account. Select "Sign Up," then pick "Teacher" followed by your institution be it "school," "higher education," or "school administration." You are then able to register using your email and a password or with a Google or Microsoft account – ideal if your school already uses Google Classroom(opens in new tab) or Microsoft Teams(opens in new tab). Once you're signed up, you can get started making your own quiz or using one of the many options already created. Or go for a bit of both, building a new quiz but using the half a million question options already available on Kahoot!

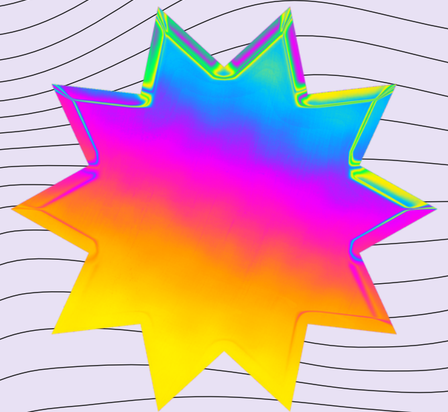
GOOGLE FORMS

What are Google Forms?

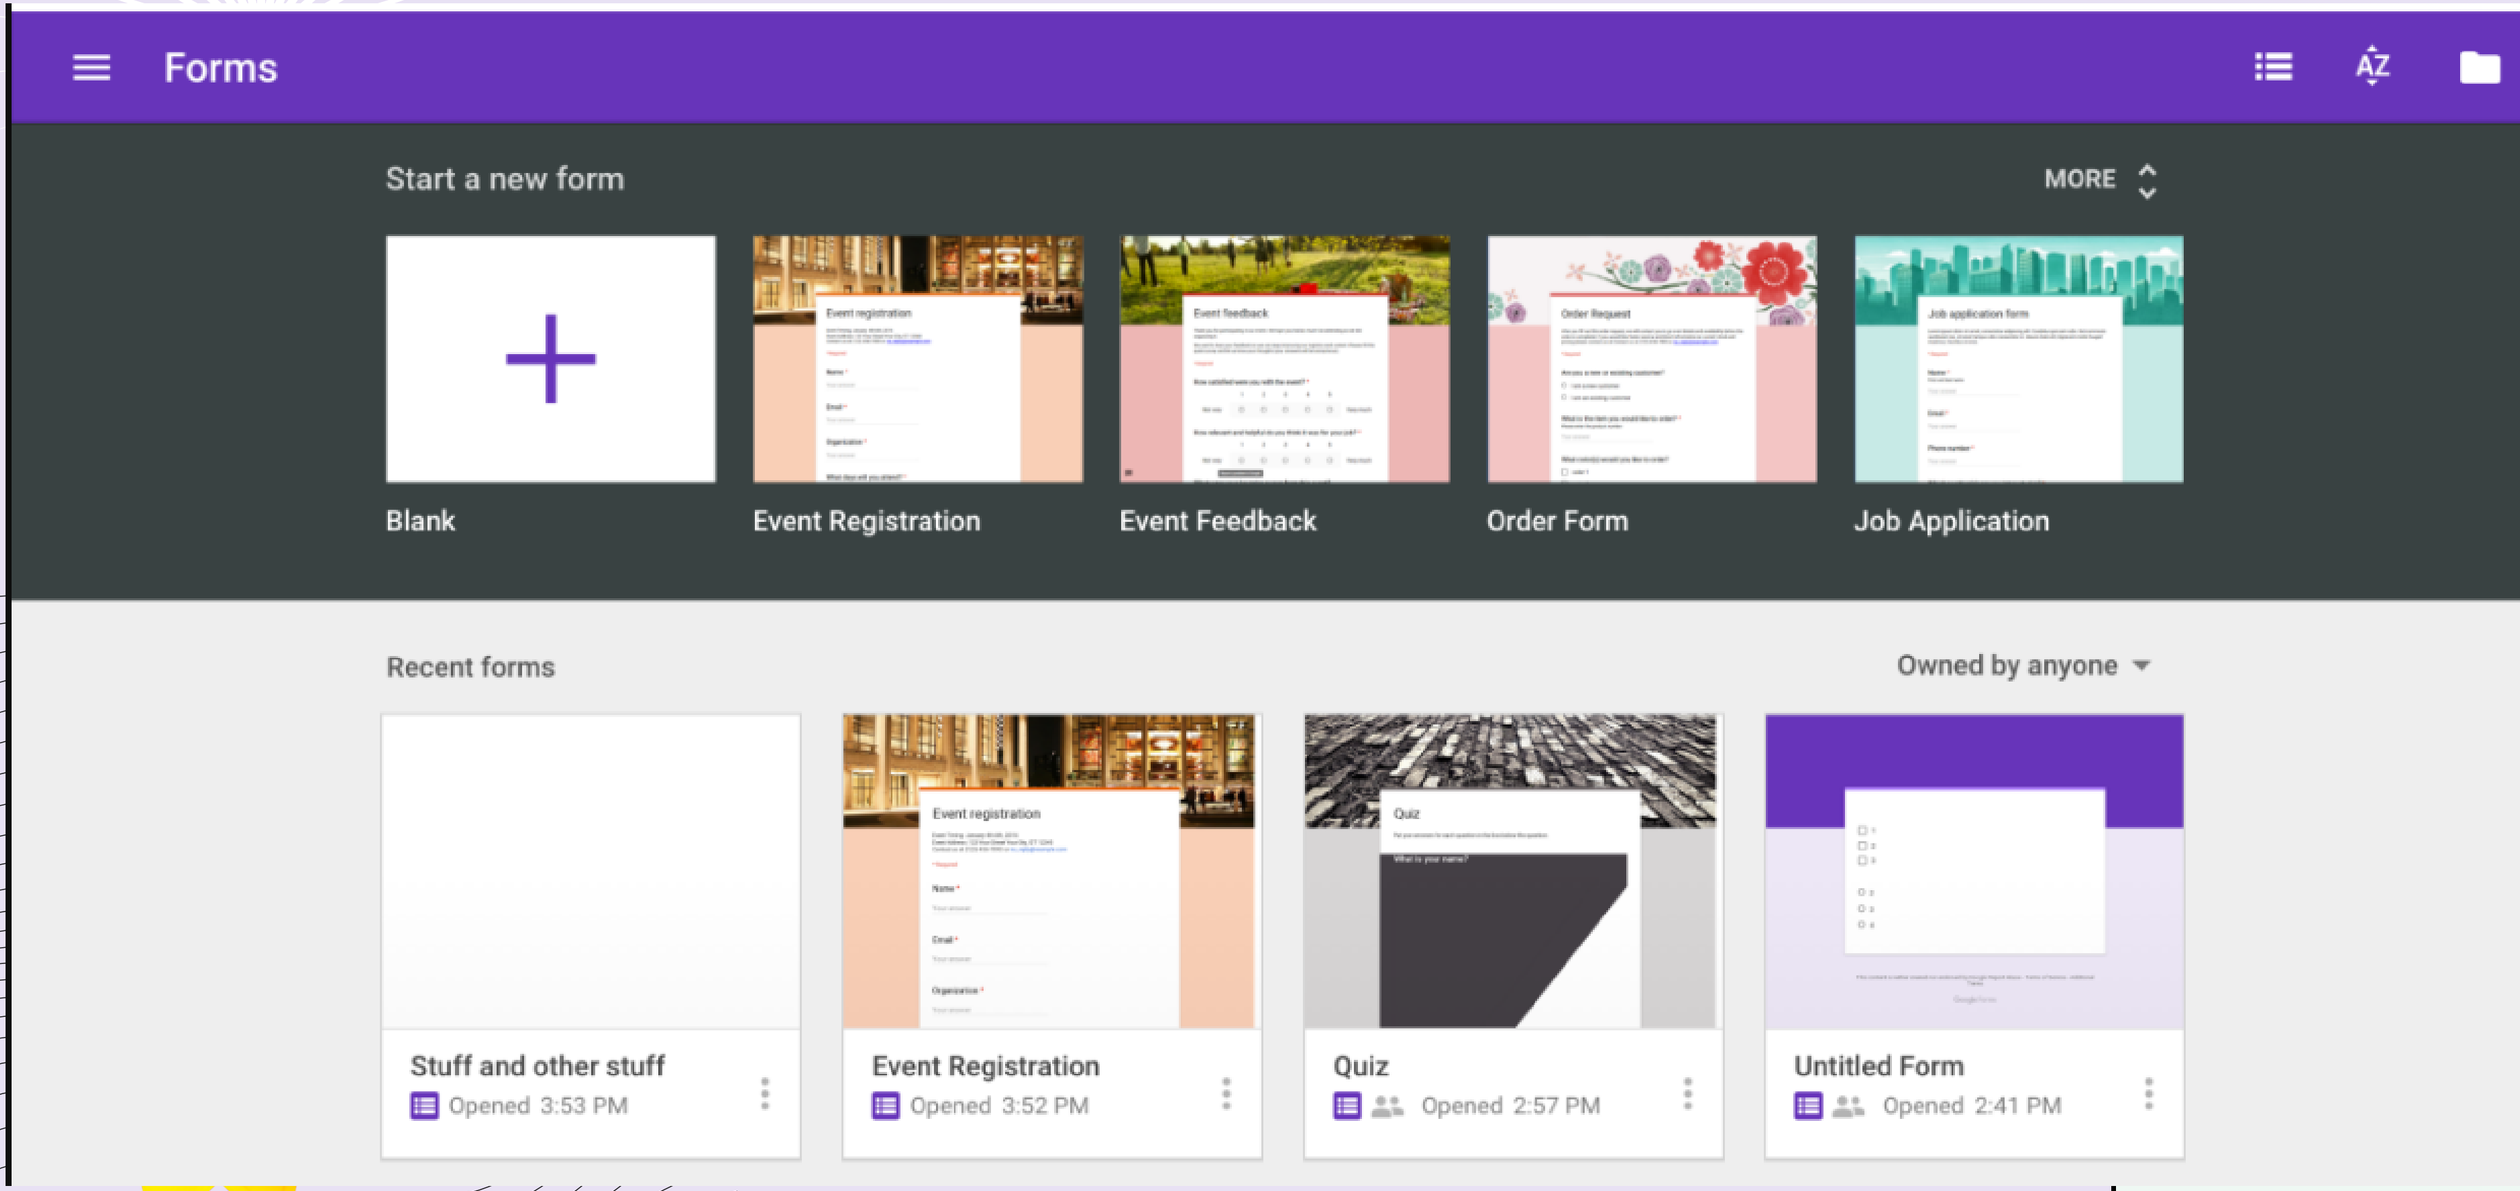
·Google Forms is a free online software for creating surveys and questionnaires.

·You need a Google account to make a Google Form, but you don't necessarily need an account to complete a form.

·You can personalize your Google Form with question types, a header image, and a color theme.



GOOGLE FORMS

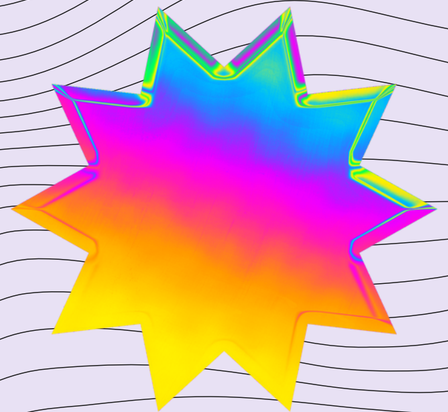


GOOGLE FORMS

What are Google Forms?

··Google Forms is free online software that allows you to create surveys, quizzes, and . It's part of Google's web-based apps suite, including Google Docs, Google Sheets, Google Slides, and more.

·You'll need a Google account to create a Google Form, but you can adjust the settings so that anyone can fill it out, meaning no Google account is required.



BLENDSPACE

Blendspace is a free and collaborative web 2 tool with which we can create interactive presentations, quizzes, worksheets, events, projects, discussions in a very short time.

With the help of Blendspace, digital content that supports in-class and out-of-class learning activities is prepared. Blendspace is compatible with mobile devices.

it has a simple interface. It provides students with the opportunity to present many different content such as web page, YouTube video, photo, test, PowerPoint presentation, Word, Excel, PDF from a single source.

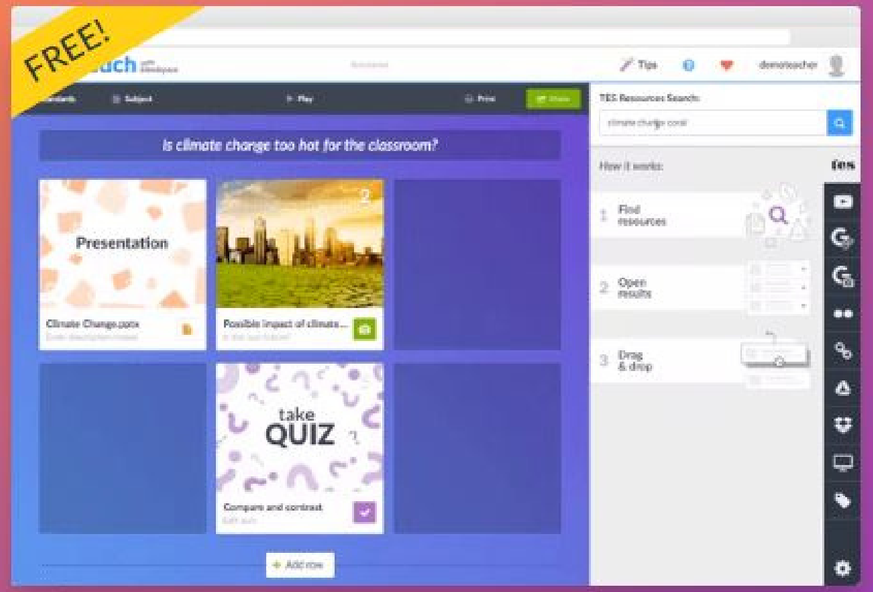
Blendspace: Create digital lessons in 5 minutes

Interactive lessons, projects, presentations and more

JOIN FREE



BLENDSPACE

This platform can be used in two ways. Firstly ,we may use content created by others or we can use them by arranging for our own lesson purposes. The second one is to prepare our own content.In both types of usage, first of all, a class must be created. While creating the class, press the create Class button, write the name of the class/course and select the class level. The code is generated automatically with the creation of the class. We share this code with students. After becoming a member, students can join the class with the given code by using the join class option.

.

After logging in with the teacher role, we can start creating our activity by pressing the New Lesson button.

BLENDSPACE

Give a name to the event you will prepare on the page that opens. At the beginning, there are 6 cells (Blendspace), the number of cells (add row) can be increased if desired. With the keyword in the menu on the right, you can reach the contents by searching YouTube, Google, Flickr, Test sources, Google Drive and Dropbox, video, image, audio, web page, and add them to the cells by drag and drop method. As we can search using keywords, we can also upload any document, photo and video from our computer. we can add multiple choice tests, we can also create quizzes (open-ended, true, false, etc.) within applications such as Google Form or share the Word file we have prepared.

.

BLENDSPACE

The content created in the form of a storyboard can be edited by selecting the grade level and course. The created content can be shared with the class so that students can have a discussion on the content. Contents can be shared via Google Classroom, social media (Twitter and Facebook), email, QR code. The privacy of the created content can be edited with options such as public, only me and only my students. If the public and only my students options are selected, other teachers can be invited to the prepared content and collaborative work is carried out. The invited teacher can make all kinds of editing and adding content.

.

BLENDSPACE

All data such as whether students like the content, comments/discussions, exam results can be checked here easily. It is a tool that can be used for all courses.

Gamified Quizzes!

Playing and creating quizzes has never been more easy!

No matter if you are an experienced quiz maker or not.

You can create workspaces, classes, quizzes and flashcards easily.

Play as a game or assign as a homework. Integrate with Google Classroom, Quizlet, Excel or try out best OCR technology.

Login ▸ Get Started ▸

QUIZFLIGHT

After choosing the question type, we immediately enter the options and indicate which options/choices are correct.

Let me tell you that you can add special score, picture, video, sound and math functions to your questions if you want.
After completing your questions, you can include many options such as time limit, start date, password, scoreboard in your exam thanks to the options on the right menu.
Another feature of QuizFlight is that you can prepare your questions in excel format and import them.

QUIZFLIGHT

If you have quizzes that you have prepared before , you can scan your exam papers and add them to the system

You can email the exam you have created to the class students you have previously defined on the system, and the system sends the exam information to the students by itself. You can get a sharing link for your exam, if you want, you can have the live qr code too.

You can create a flashcard yourself, add description, picture, sound, video to it. You can even record your own voice and create a flashcard that is completely yours.

Quizizz

Quizizz is a WEB 2.0 tool for preparing online gamified quizzes and interactive lessons.

How to use Quizizz?

- ***. You can prepare multiple choice, true-false, survey, fill-in-the-blank,fun tests, quizzes or competitions with different methods.***
- ***You can prepare presentations suitable for your course achievements in every field and use them interactively with synchronous or asynchronous methods.***

Quizizz

How to use Quizizz?

- ***You can have your students participate and practice all the work you have prepared synchronously during the lesson or asynchronously after the lesson.***
- ***Your students can participate and apply all the studies you have prepared with any device they wish.***

ACTIONBOUND

A tool that you can give your students a great gaming experience by gamifying your lesson.

Actionbound, which is one of the tools we use and love most, is a game that can be prepared on a computer and played with a mobile phone or tablet. It includes questions, research, assignments, etc.

After you log in , you can start your work. Then click on “create a new bound “ and add a title for your action bound . Then click on “my own bounds “and click on “edit “ and start to prepare.

ACTIONBOUND

Creating treasure hunt with Actionbound

1. ***You should choose the language of the page. It can be used English or German.***
2. ***. You should log in to register the site.***
3. ***. Choose a username. Type e-mail. Write password twice.***
4. ***. Start now with Login.***
5. ***. Start creating your new bound.***
6. ***. Choose a title and decide your game link.***
7. ***. You will see this screen.***

Creating treasure hunt with Actionbound

8- Do not click the sub- choices now. . Click the «Edit» button itself.

9-After you click on the ‘Edit’ button, you see a blank screen. Only your title is written here. Start creating your Actionbound from this ADD button..

10- In Stage section, you need to write a headline related with your game. You can also select your location.

11- Add your headline and you will get a screen like this.

12 - Information section is a place where you write necessary info about your exam such as you have 15 seconds for each question. You can also add image, video or audio file, attach a link.

add button each time.

Creating treasure hunt with Actionbound

13- Quiz is a part where you write your questions. I am writing two multiple choice questions as an example. You can increase the number of questions. You should write a new question and click.

14 - Do not forget to click the right answer. Decide points for each question. How many attemps do the students have. If they have a choice to give more than one answer, then how many points they will use for each wrong answer.

15 - It is useful to have time limit for each question. After their time is up, they will get less points even if they give the right answer .

16- On mission part, you can write a task for your students. You can add an image, video or write a task.

Creating treasure hunt with Actionbound

17- Group members play against each other in this part. NOT:You can leave this area blank if you do not want to use it. .

18 - QR code area is the most useful part for your game. In order to see the next question, they need to scan the barcode you hang on different places. You can add a «Mission» sentences such as scan the QR code hidden in 2nd floor.

19 - You will the each item you saved when you «Add» Do not forget to save the QR code and print.

20 - «Find Spot» is a place where students need to arrive. When they reach the correct area, they can pass this part.

Creating treasure hunt with Actionbound

21 You have a chance to learn their ideas with «SURVEY»

22 -Now it is time to check out «Sequence» part that takes part above. You can reorder your questions in whatever order you like.

23 - You can add a logo or write general information from «Setting»

24- This part must be chosen to play as a team.

25- «Test» section gives you a QR code which starts the game.

26- After you finish editing, you can reach your game from «my bounds» section.

27- You should «switch online» in order to start playing.

Creating treasure hunt with Actionbound

28- After students accomplished all tasks, you can see all «results»

29 -Here are some results screenshot: You can see which team collected how many points in what time.

HOW STUDENTS SEE THE GAME?

30 - They scan the QR code to start.

31- They should click «Start Bound».

32- They should write the name of their team and names of team members.

33- They read the general information and click next.

Creating treasure hunt with Actionbound

34- ***They will see the first question you put in order from Sequence part.***

35 -Here They gain points when they give the right answer. They will proceed by clicking next.

36 - They will scan the QR code and collect points.

37- They will see how many points they have collected so far. They should 'Send' it in order to make it visible for you.

38- They will learn by playing. Have fun together!
